

- Maurice Leclaire
- PhD candidate, Chair of Network Architectures and Services
  
- Network Coding / Opportunistic Routing
- Modelling Coded Networks
- Feedback in Coded Networks
- Wireless Media Access
  
- DFG Cyber-Physical-Networks (Moonshine: Reproducible Wireless Measurements)
  
- TUMexam: electronically supported examinations

- How can we solve flow models (for bidirectionally coded wireless networks) efficiently and distributed?
- What is efficient feedback in coded networks?
- How can we model the effects of lossy wireless networks from the perspective of the application layer?
