

About me

- Amir Varasteh
- Ph.D. Candidate
- Chair of Communication Networks, TUM
- 2017-Present

Research Interests

- Mobile Edge Computing
- Network Function Virtualization
- Software Defined Networking

Open Questions

1. How to perform mobility-aware service provisioning?
(known future, e.g. Aircrafts)
2. How to guarantee QoS parameters (e.g., Delay and resilience) in dynamic environments?
3. What about a case with unknown future, e.g., autonomous driving?
