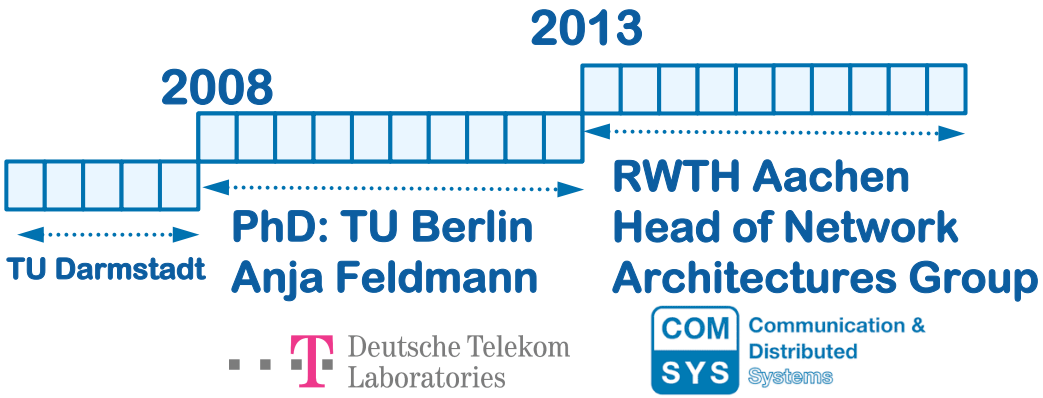
Oliver Hohlfeld

I like measuring stuff



Research Interests

Internet Measurement

Architectures: SDN / NFV

Quality of Experience

Challenges / Provocative Questions

- **Where is Networking Research in 2020?**
  - Is networking a *solved* problem? (i.e., it has become the plumbing of computing)?
  - Future topics: security, big data, application (e.g., IoT) rather than core networking?

- **Network Management**
  - How far can we go with softwareization?
  - Provocation: can machine learning obsolete network engineers?
  - Which abstractions are required to handle a zoo of technologies?
    - Programming / Testing / Orchestration / Verification
