

# Our supporters

**[your logo could go here]**

# Jörg Ott

- TUM, CS, Chair of Connected Mobility
- Working on
  - Mobile connectivity and service platforms
  - Transport protocols: QUIC and next steps
  - Network architecture (DTN, ICN, mobility\*, ...)
  - Measurements (fixed, mobile networks)
  - Mobility pattern inference and mobility modeling
  - Recommender systems
- WebRTC real-time measurements ([callstats.io](https://callstats.io))
- Hyperlocal networking ([spacetime.networks.com](https://spacetime.networks.com))

# Interests and questions

- Cloudless networking and “Distributed Internet”
- Composable services for mobile users
  - Application (de)composition and service migration
  - Taking another look at ubiquitous computing environments
  - Exploring different languages and flavors of “virtualization”
  - Case study: Internet of Things
- Extending QUIC
  - Real-time transport (RTP++)
  - Lightweight QUIC for IoT
- Future network access with extreme mobility
